## Tooele Chemical Agent Disposal Facility (TOCDF)

Located at the U.S. Army's Deseret Chemical Depot (DCD), Stockton, Utah

Class 3 Permit Modification Request:

### *"Igloos 1632 and 1634 Permitted Container Storage"*

<b>What is the permit modification about?</b>	<p>TOCDF has completed the majority of its overall mission to destroy the portion of the U.S. Army's chemical weapons stockpile that resides at the Deseret Chemical Depot. In anticipation of completion of chemical weapons, TOCDF is preparing to begin final closure activities, which includes the elimination of "secondary waste" that has been generated since the commencement of chemical weapons processing in 1996. Much of the secondary waste generated has been properly containerized, and returned to DCD Area 10 for storage over the course of the project.</p> <p>Previously used for munitions storage, many of the DCD Area 10 earth-covered storage bunker "igloos" have been permitted by DCD for the storage of TOCDF-generated hazardous waste. In order to more effectively perform waste management activities such as drum sampling and treatment, TOCDF is proposing to permit and manage two of the Area 10 igloos (1632 and 1634) for hazardous waste container storage. These two particular igloos have been selected due to their proximity to igloos currently in use by TOCDF personnel for sampling activities.</p> <p>This Permit modification request is identified by the alphanumeric designation <u>TOCDF-IGLOO-03-0983</u>.</p>
